

Wednesday, October 14, 2015

Dear Participating Home Performance Contractors,

We invite all contractors to attend an upcoming webinar, Accurate Savings Predictions; Closing the gap between savings projections & realization rates, as part of our ongoing Technical Webinar Series. This webinar is scheduled for **Wednesday, October 28, 2015 from 3:00pm to 4:30pm**. [Click this link to register.](#)

Register

The history of the Home Performance with ENERGY STAR Program has been built on saving customers energy.

Predictions are given to the customer about how much energy they can expect to save. To make sure these predictions are realized the home must be well understood and modeled accurately. Accurately projecting savings requires good data and how much you predict to save your customers is important. This starts during the home assessment and is captured in the model.

Recent evaluation has shown that customers are not seeing the savings they expect post improvement.

This webinar will provide information on how you can bring realization rates and savings predictions into alignment.

Some of the items covered in this webinar will include the following:

- Contributing factors to unrealized savings
- Tightening up true-up activities
- Accuracy in data collection

Presenters for this webinar will include your CLEAResult Account Managers and Technical Support Analysts who pull from a collective 40 years of experience in the industry.

Please be on the lookout for future invitations these technical webinars. For questions, suggestions for future technical webinars or feedback, please feel free to contact CLEAResult Eastern Account Manager, Peter Hoke at Peter.Hoke@clearesult.com or Western Account Manager, Ryan Moore at Ryan.Moore@clearesult.com.

Thank you.

About NYSERDA

NYSERDA, a public benefit corporation, offers objective information and analysis, innovative programs, technical expertise, and funding to help New Yorkers increase energy efficiency, save money, use renewable energy, and reduce reliance on fossil fuels. NYSERDA professionals work to protect the environment and create clean-energy jobs. NYSERDA has been developing partnerships to advance innovative energy solutions in New York State since 1975.
