

Dear Participating Home Performance Contractors,

We invite all contractors to attend an upcoming webinar, Best Practices for HVAC Commissioning, as part of our ongoing Technical Webinar Series. The webinar is scheduled for **May 27, 2015 from 3:00pm to 4:30pm**. [Click here to register](#).

Register

A quality installation is more than just using high-efficiency products and systems. This session will provide a broad range of critically important processes and procedures to ensure HVAC systems are installed properly and operate at their greatest energy efficiency. Tools and techniques for testing Forced Air and Hydronic systems will be covered. The webinar will be presented by Louis Marrongelli and Earl Hicks, Sr. Technical Analysts from Conservation Services Group. They draw from over 50 years of HVAC and home performance experience.

Objectives: By attending this session, attendees will:

- Learn step-by-step procedures for proper commissioning;
- Understand how the NYSERDA Home Performance with ENERGY STAR® & EmPower Programs Material & Installation Guidelines and ACCA 5 HVAC Quality Installation Specifications can guide your commissioning process;
- Learn how and where to document the commissioning results;
- Learn the importance of educating your customers with information that will help them responsibly and comfortably enjoy their equipment; and
- Learn how properly commissioned installations can promote and build your business.

Your participation in this webinar is strongly encouraged. This webinar will discuss guidelines that are part of the Program's Material and Installation Guidelines that contractors are expected to follow.

Please be on the lookout for future invitations to these technical webinars. For questions, suggestions for future technical webinars, or feedback, please feel free to contact CSG's Partner Services Manager, Bou Reed at boujeloud.reed@csggrp.com.

Thank you.

About NYSERDA

NYSERDA, a public benefit corporation, offers objective information and analysis, innovative programs, technical expertise, and funding to help New Yorkers increase energy efficiency, save money, use renewable energy, and reduce reliance on fossil fuels. NYSERDA professionals work to protect the environment and create clean-energy jobs. NYSERDA has been developing partnerships to advance innovative energy solutions in New York State since 1975.
