

Dear New York Home Performance Contractors,

We invite all contractors to attend an upcoming webinar, **Truing Up to Billing Data: The Imperative for Accurate Software Estimations**. This webinar is scheduled for **April 13th, 2015 from 9:00am to 10:30am**. [Click this link to register](#).

This session will provide concrete procedures and examples for 'truing-up' home performance energy savings estimates. Software-based home performance savings estimates have consistently been overestimated; this presentation will provide real software solutions and then discuss programmatic imperatives to model real-world savings. The webinar will be presented by Dave Beaulieu, Program Director at Conservation Services Group and Ethan MacCormick, VP Services to Energy Businesses, of Performance Systems Development.

Objectives: By attending this session, attendees will:

- Learn quick techniques and best practices for 'truing-up' their energy models to actual energy consumption history to increase savings prediction accuracy.
- Learn how and why model calibration can save the contractor time building their energy model.
- Understand how the ANSI/BPI-2400 standard supports model calibration and improved accuracy of energy savings estimates.

Your participation in this webinar is strongly encouraged, as contractors are expected to true up their energy model to actual energy bills.

Please be on the lookout for future invitations to the technical webinar series. For questions, suggestions for future technical webinars or feedback please feel free to contact CSG's Partner Services Manager, Bou Reed at boujeloud.reed@csggrp.com.

Thank you.

About NYSERDA

NYSERDA, a public benefit corporation, offers objective information and analysis, innovative programs, technical expertise, and funding to help New Yorkers increase energy efficiency, save money, use renewable energy, and reduce reliance on fossil fuels. NYSERDA professionals work to protect the environment and create clean-energy jobs. NYSERDA has been developing partnerships to advance innovative energy solutions in New York State since 1975.
