Have you been following Building Performance Institute's (BPI) "Technical Standards for the Building Analyst Professional" for years? Have you heard about a new "BPI-1100" standard and are wondering what changes it'll bring? Are you interested in learning how this will affect your company once the new BPI-1100-T-2012 Home Energy Auditing Standard go into effect on September 30th 2014? If so, this course is for you.

Course Description:

This 90-minute webinar walks through each section of BPI-1100-T-201x, "Home Energy Auditing Standard," and examines how they differ from your initial training. When necessary, you'll get further detail on topics like reducing baseload and inspecting solid fuel appliances. Because BPI-1100 only covers what to do, and not how to do it, you'll also get a preview of what to expect from BPI-1200-S-201x, "Standard Practice for Basic Analysis of Buildings."

Course Learning Objectives

After this course you'll know:

- How BPI-1100-T-201x differs from "Technical Standards for the Building Analyst Professional";
- When you should still follow the procedures in the "Technical Standards"; and
- When you should consult your program on what new procedures to follow.

Course Details:

Length: 90 minutes

Course Agenda:

- Scope
- General Requirements
- Health & Safety
- Disclosure & Ethics
- Combustion Appliance Testing
- Indoor Air Quality and Ventilation

- Moisture Control
- Building Enclosure Performance
- Heating and Cooling
- Baseload & Water Conservation
- Cost-Benefit Analysis
