

Release of EmPCalc 5.1.0

A new version of EmPCalc has been released for use with all projects with a start date (EmPower referral acceptance) or application submitted date of 9/1/16 or after. The new pricing, which was part of the participation Agreement, is in effect for all customers approved by EFS on 9/1/16 or after.

Here are the significant changes in this new version.

- At this time EmPCalc is still for use with EmPower-funded measures only. Be sure the “EmPower Only” button is clicked for all projects

AHP Only	<input type="radio"/>
Coordinated	<input type="radio"/>

- Lighting Tab- **Under the new Participating Agreements effective September 1, 2016, EmPower New York has eliminated the incentive for Compact Florescent Light (CFL) bulbs in favor of more energy efficient LED bulbs. We recognize that some contractors may still have an inventory of CFLs on-hand. In order to provide an opportunity for Contractors to draw down this inventory and prevent waste, EmPower will continue to incentivize CFLs through November 30, 2016 at the current price. After this date, it is expected that CFLs will be fully phased out. Please use the Other Tab to record the installation of CFL’s during this grace period.**
- Lighting Tab – Hard-wired CFL fixtures and Torchieres are no longer funded under EmPower and these items have been removed from the Lighting Tab.
- Heating System Tab – **For National Fuel Customers Only** – Wi-Fi enabled programmable thermostat should now be installed. There is also a Drop-Down box to indicate why a Wi-Fi Enabled thermostat was not installed.

- Insulation Tab – A one time “Small Project Set-up Fee is now allowed for projects where a total square footage is less than 500 sq. ft. of blown insulation is installed. This set-upfee is \$125.00. There is also a one-time “Small Project Set-up Fee for Rim Joist were the total projects where less than 150 linear feet is installed and no other HP measures are approved. This set-up fee is also \$125.00
