

NYSERDA is passing along the following survey for your consideration.

With funding from the DOE Building America program, researchers are developing an ERV that integrates with efficient heating and cooling systems. A quick description is here: <https://www.swinter.com/party-walls/erv-ahu/>

Initial results from prototypes have been very promising. As the project moves towards commercialization, researchers are trying to get feedback about current ventilation practices, wants, needs, cost ranges, etc. If you have time to complete a short survey (~5 minutes), they'd appreciate it! It's anonymous (unless you choose to give your e-mail).

Survey Link: <https://forms.office.com/Pages/ResponsePage.aspx?id=SKgL82rMVUKqgaqBPQIHvxR2JNY9UxiOiVV9K63gB-hUNkJPWIU0RTEyOUhOMIA0SIIOMzU4MkNVVy4u>

Thank you,  
The NY Residential Existing Homes team
