# **EmPower and Assisted Home Performance Heat Pump Pilot Study**

### LMI Adder Pilot Study

- <500 single family homes
- Development of short-term statewide standard offer incentive structures and program guidelines
- Eligibility parameters will be developed to address:
  - Fuels displaced to help ensure maximum benefit to the household/building
  - Minimum standards for building shell performance consistent with Comfort Home
  - Minimize cost-shifting of heat to tenants
- Collection of data and market insights on heat pump installations, including DHW
- Need utility input on plan and learning objectives
- Need to work together on transition plan to apply learnings to the next phase

### Adders Pilot Study Learning Objectives

- Test drive rules and mechanics for an additional heat pump incentives for LMI customers
- Develop a deep understanding of early building profiles/characteristics that represent the largest opportunity
- Measure household specific affordability/energy burden impacts
- Spur market learning and contactor partnerships to install heat pumps in early phase LMI households
- Gather market data on need and cost for electric panel/service upgrades needed

## **Program Basics**

•Goal: To study the impact of Heat Pumps on the LMI Market and plan for the permanent integration of heat pumps into LMI by 2025.

What type of equipment? Air Source Heat Pumps, Ground Source Heat Pumps, and Heat Pump Water Heaters.
What contractors can participate? -Current contractors with active Participation Agreements in the EmPower or Assisted Home Performance Programs. If a contractor is not active in those programs, they can partner with a contractor who is.

•Who can install the heat pumps? – NYS Clean Heat Participating Contractors

•What customers can participate? -1-4-unit homes with resident paid utilities. Residents must qualify for EmPower or Assisted Home Performance. Can be rentals or owner occupied.

•What fuels can be replaced?- All non-natural gas homes will be eligible, including electric, oil, propane, and wood.
•Full load or displacement? - The heating system must be replaced with heat pumps that can cover 90-120% of the building load with the heat pump. No hybrid systems for this study. Existing system can remain in place.
•How many jobs can a contractor do?- The budget for the program is \$5 million and no contractor can use more than 20% of the funds.

•How will we know how much funding is left?- There will be a tracker on the Contractor Resource Page.

### **Insulation Level Requirements**

Minimum Levels of Insulation in household (must be verified with an energy audit)

Area	Required Insulation level				
Walls	R-14				
Attic	R-30 average				
Attic Hatches	R-20				
Pull Down Stairs	R-13				
Rim Joists	R-14				
Mobile Home Walls	R-6				
Mobile Home Attic	R-24				
Mobile Home Belly	R-21				
Air tightness	5 ACH				

### Heat Pump Requirements

These guidelines align with utility specifications.

- 1. Must cover 90% to 120% of building load.
- 2. ASHP- NEEP Cold Climate
- GSHP- Each heat pump in the system must be ENERGY STAR certified and meet or exceed ENERGY STAR Tier 3 Geothermal Heat Pump Key Product Criteria.7
- 4. HPWH-  $\leq$  55 gallon- UEF > 2.0, > 55 gallon UEF  $\geq$  2.2UEF

#### **Incentive Structure**

#### **Proposed** Adders- Incentives will cover project up to 60,000 btu/heating

Description	Incentive type	EmPower	АНР		
Upstate ASHP	\$/10,000 btu	\$3,000	\$1,500		
Downstate ASHP	\$/10,000 btu	\$2,200	\$1,100		
Upstate GSHP	\$/10,000 btu	\$3,800	\$3,800		
Downstate GSHP	\$/10,000 btu	\$3,800	\$3,800		
Upstate HPWH	\$/unit	Normal EmPower	\$975		
Downstate HPWH	\$/unit	Normal EmPower	\$825		
Panel Box Upgrade/ Distribution Improvements	≤ 100 Amps	Up to \$2,000	50% of Cost up to \$1000		

Downstate counties: New York, Bronx, Kings, Queens, Richmond, Orange, Rockland, Westchester, Putnam, Sullivan, Dutchess, & Ulster

### **Additional Incentives**

- Panel Boxes- If a panel box is ≤ 100 Amps it can be replaced automatically through the program. If it is greater than 100 Amps than a NEC worksheet must be filled out showing a need for the larger service. The program will provide up to \$2,000 for EmPower eligible clients and up to \$1,000 for AHP clients. The contractor must also provide a photo of the panel box and an invoice for replacement to take advantage of the adder.
- Heating System Distribution Improvements can also be covered by the \$2,000/\$1,000 adder if needed for the proper functioning of the distribution system.
- If a heat pump contractor is having an AHP/EmPower contractor process their paperwork, the AHP/EmPower contractor may charge an \$500 subcontractor fee. The 5% AHP contractor incentive does not apply for this program.

### **Project Example**

Incentives are based on 10,000 btu of heating.

For example: 2 ton heat pump (20,000 btu/hr heating) Upstate Air Source Heat Pump for a low income customer the incentive would be \$3,000 per 10,000 Btu/hr x 20,000 Btu/hr= \$6,000

The home could also receive a \$2,000 panel box/ distribution improvement incentive and \$7,000 for building performance improvements.

EmPower Heat pump	\$6,000
EmPower Panel box	\$2,000
EmPower EE	\$7,000
Utility Incentive	\$2,000
Total	\$17,000

### **Documentation Requirements**

- 1. Customer Attestation
- 2. Contractor Attestation
- 3. Picture of Panel Box
- 4. Invoice for the heat pumps
- 5. Invoice for the Panel Box

Certificate of Completion

EmPower New York Assisted Home Performance with ENERGY STAR®
Customer Name:
Contractor Name:

EmBawer ID#:\_\_\_\_\_ AHP ID:\_\_\_\_\_

Contractor: I, \_\_\_\_\_\_\_\_attest that all measures completed by my company for EmPower New York/ Assisted Home Performance adhere to current standards defined by the Building Performance Institute (BPI) and the current EmPower New York/ Assisted Home Performance Program Guidelines. I further attest that for all Home Performance designated projects, I have conducted the appropriate Combustion Appliance Zone (CAZ) testing and left the home in a safe condition as per BPI Standards.

I attest that I have educated the customer on the use of their heat pumps and any effect they may have on their utility bills. The customer has signed the NYSERDA attestation and it will be completed in project completion paperwork.

I attest that this project adheres to the <u>NY Clean Heat program Guidelines</u>, that a Manual J has been performed for this home, and that I or the NYS Clean Heat contractor will be applying for a reimbursement from the NY Clean for a utility heat pump rebate.

I attest that my company is responsible for collecting the utility rebate for this project and I will not hold the customer responsible for the contractor's failure to collect these funds. I will also not place a lien on the customer's property for outstanding funds that were promised as a utility rebate.

Company Owner signature:

### Upcoming EmPCalc Updates

- > Additional inputs being added to accommodate requested information
  - Update to ASHP tab
  - Add new GSHP tab
  - Subcontractor Fee
  - Dwelling's Existing Insulation Levels
    - Attic
    - Attic Hatches / Pull Down Stairs
    - Knee walls
    - Walls
    - Rim Joist
    - Mobile Homes (Attic, Walls, Belly)
  - Electrical Panel
- > Mandatory upgrade to latest EmPCalc version will be required

### **EmPCalc: Air Source Heat Pump**

- > ASHP Calculator tab
  - Tab will be updated to align with version in ASHP Proforma
- > Enter information on new and existing heating systems
- > EmPower
  - Appears as Heating Replacement
- > Express Contract
  - Appears as Heat Pump

### **EmPCalc: Ground Source Heat Pump**

- > GSHP Calculator tab
  - New tab will be added
  - Aligned with GSHP Proforma
- > Enter information on new and existing heating systems
- > EmPower
  - Appears as Heating Replacement
- > Express Contract
  - Appears as Heat Pump

### **EmPCalc: Heat Pump Water Heater**

- > Use existing DHW Tank tab
- > Enter information on new and existing heating systems
- > EmPower
  - Appears as Water Heater Replacement
- > Express Contract
  - Appears as Heat Pump Water Heater

### Project Submission: EmPower Approval

- > Existing Requirements
  - EmPCalc
  - Signed Homeowner's Agreement
  - Combustion Appliance Form
  - House Diagram
  - Signed Appliance Exchange Agreement
  - Photos

- > Additional Documents
  - Signed Contractor Attestation Form
  - Signed Customer Attestation Form
  - Subcontractor Invoice (if one used)
  - Electrical Panel Verification (photo/NEC Form)

### Project Submission: Express Contract Approval Submission

- > Workscope HPXML stage
  - Indicate if there is any additional project funding
    - Is the homeowner receiving any third part grants or rebates, including EmPower funding, tax credits, or avoided replacement costs?
  - Indicate if a Subcontractor is being used
  - If yes, input Subcontractor's name
- > Additional Rebate and Grants stage
  - Answer all questions on rebates, EmPower, grants and tax credits
    - Include amounts and name
  - Indicate if any avoided replacement costs should be accounted for
    - If yes, brief summary of avoided replacement costs
    - Total amount of replacement costs
- > Workscope Screening and Approval stage
  - Include the following supporting documentation
    - Signed Customer Attestation Form
    - Signed Contractor Attestation Form
    - Electrical Panel Verification (photo/NEC Form)

### Project Submission: Express Contract Completion Submission

- > Final Project Documents stage
  - Upload the following documentation
    - Existing Documentation
      - Signed Contract
      - Signed Customer Information Form
      - Signed ESR
      - Post Installation Health & Safety Test Results
      - Subcontractor Invoice (if one used)
    - New Documentation
      - Signed Contractor Attestation Form
      - Signed Customer Attestation Form
      - Electrical Panel Verification (photo/NEC Form)
