

A photograph of the New York State Capitol building in Albany, New York. The building is a large, ornate, light-colored stone structure with multiple stories, arched windows, and a prominent central tower with a red-tiled roof. A wide set of stone steps leads up to the entrance, flanked by green trees and a small statue. The sky is blue with some white clouds.

# CLEAResult<sup>®</sup>

We change the way people use energy.<sup>™</sup>

**CLEAResult**

In support of programs administered by

**National Grid (Weatherization, Health and Safety)**

**NYSERDA (EmPower+ Program)**

National Grid Weatherization,  
Health and Safety and NYSERDA  
EmPower+ Program Coordination

we will be starting shortly...

*August 25, 2026*

# Agenda

- ✓ Introduction to Teams
  - ✓ National Grid
  - ✓ CLEAResult
- ✓ Program Description
- ✓ Customer Eligibility
- ✓ Eligible Measures
- ✓ Q&A

# Weatherization Health and Safety Program - Program Description

- ✓ National Grid's Weatherization Health and Safety (WH&S) program provides assistance with funding for the identification and remediation of potential health and safety issues which may impede other energy efficiency related work.
- ✓ Each approved WH&S project will be covered by National Grid at **no cost** to the customer.

# Weatherization Health & Safety – Customer Eligibility

- ✓ Residential National Grid account holder (Customer of Record) must heat with gas and/or electric or be in the process of completing the conversion to electrification with documented proof.
  - Downstate NY (gas heat only), counties served:
    - KEDLI (Nassau, Suffolk, Far Rockaway),
    - KEDNY (Kings, New York, Queens, Richmond)
  - Upstate NY (gas or electric heat), counties served:
    - NMPC (Albany, Allegany, Cattaraugus, Chautauqua, Columbia, Erie, Fulton, Genesee, Herkimer, Jefferson, Madison, Montgomery, Niagara, Oneida, Onondaga, Orleans, Oswego, Rensselaer, Saratoga, Schenectady, Warren, Washington, Wyoming)
- ✓ Customer of record must provide proof of income for each member of the household via self-attestation or participation in other income-qualified programs (HEAP, SNAP, SSI, SSD, etc.)
- ✓ Dwelling must be either:
  - A single-family building with the customer of record (account holder) as the applicant for service
  - A 1-4 family building with customer of record as the applicant for service and the building owner's written consent

# Weatherization Health & Safety – Service Territories

# Weatherization Health & Safety - Eligible Measures

- ✓ **Carbon Monoxide Hazards** – Mitigation measures may include but are not limited to the following:
  - Properly venting water heaters to reduce spillage and increase draft;
    - Repairing broken plumbing vents connected to active service;
    - Stove/oven replacement – leaking gas or hazardous gases or creating a potential fire hazard due to current operating conditions.
- ✓ **Gas Leaks and Pipe Repair** – Remediation activities may include but are not limited to:
  - Patching and/or retightening pipe connections/unions;
  - Rerouting piping to promote safety and compliance with operating standards;
  - Pressure testing gas systems.
- ✓ **Ventilation Remediation (Installation of Exhaust Fans)** – replacing existing fans that are inoperable, unsafe, and/or creating potential electrical fire hazard.
- ✓ **Replacement or Installation of New Ventilation Systems**
  - Installation, replacement, and/or modification of ventilation systems to include gravity exhaust or mechanical ventilation systems.
- ✓ **Combustion Appliance Ventilation**
  - Properly venting combustion appliances such as space heating and water heating equipment, wood or natural gas fired fireplace, and cooking equipment inside conditioned living space.

# Weatherization Health & Safety – Eligible Measures (continued)

## ✓ **Roof Repair/Replacement**

- Repairs to include but not limited to patching, sealing, and/or replacing identified areas of leakage into the building shell;
- Repairs to roofing system penetrations such as chimneys, ridge vents, roof vents, soffits, and fascia;
- Replacement of roofing systems over conditioned living space when repairs are no longer possible or effective or when the roof has reached the end of its useful life.

## ✓ **Domestic Water Systems**

- Water/wastewater issues within conditioned living spaces;
- Broken/leaky plumbing repair and replacement;
- Addressing gray/black water lines from long-term leaks around toilets and sinks.

## ✓ **Suspected Electrical Issues**

- Unsafe/non-code compliant wiring;
- Knob and tube wiring.

## ✓ **Suspected Environmental Hazards**

- Asbestos;
- Vermiculate;
- Mold and/or mildew and/or other identified organic hazards;
- Inadequate moisture abatement systems, including, but not limited to, dehumidification systems, sump pumps, gutters, and drains;
- Pest mitigation.
